Presents:

The Model Railroad Sound Module (Stereo) \$39.95 MSRP plus shipping.

We are proud to used to provide background sounds for your model railroad layout. The flexibility and quality of sound this provides will add the next dimension to your model railroad.

The Stereo Model Railroad Sound Module consists of:

- A power supply regulator adjusted to a 5 volt output capable of a 2 amp output.
 - This can also be used for powering LED Lighting etc on your layout.
- A MP3 player set up for a continuous play feature.
- This player is set up to use an inexpensive pair of powered PC speakers for a true stereo effect.
 - Optionally a speaker can be hooked up to the terminals for an 2 watt monaural output.
- A (1) GB Micros SD card including 400+ MB's of high quality MP3 files.

The following sound files are available:

1. Cattle car
2. Machine Shop
3. Waterfall
4. Swamp
5. Ocean sounds with and without seagulls
6. Cicada's
7. Train station with and without announcements

The Railroad Sound Module requires :

- 6.5 - 20 Volts AC or DC attached to the red/black wires. (DCC track power can be used if desired)

Special instructions for The Railroad Sound Module :

- Mounting the module can be accomplished with double sided tape or a #4 screw through the mounting holes on the power supply regulator.
- The module will automatically start to play the sounds when power is hooked up to the leads.
- The module will play the files in sequence and loop back to the beginning when the last file is played:
 - If a single sound is desired, simply remove the Micro SD chip by pushing it in and letting it spring back. (Keep your finger on it)
 - Take it to your PC or Mac and delete the files that you do not want. (I recommend copying them to your PC or Mac in case you desire to use them later)
 - Reinstall the Micro SD in the player and it will loop the files that are remaining.
- Custom recordings are available for a nominal charge. Two sounds can be split into the left and right channels, so two areas can have different sounds playing. Additionally adding customized voice overs making announcements are available. Send an email for more information.
